Professional Summary

Full-stack developer with hands-on internship experience building and shipping production features across the MERN-adjacent stack (React, Node.js, Express, .NET, MySQL, MongoDB). Comfortable owning a feature end-to-end — from REST API design and authentication to responsive, state-managed frontends. Strong CS fundamentals in C, C++, Java, and Python, with a growing interest in explainable AI and knowledge representation.

Education

YBN University <i>Bachelor of Technology in Computer Science Engineering</i>	Ranchi, Jharkhand <i>2023–Present</i>
RK Govind +2 High School <i>Intermediate</i>	Garhwa, Jharkhand <i>2021–2023</i>
High School Kikra Danda <i>Matriculation</i>	Garhwa, Jharkhand <i>2020–2021</i>

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, React Native, Redux, HTML5, CSS3, Material UI (MUI), Tailwind CSS
Backend: Node.js, Express.js, .NET, RESTful API design, JWT authentication
Databases: MySQL, MS-SQL, MongoDB, PostgreSQL
AI/ML: TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib
Tools & DevOps: Git, GitHub, Docker, Jenkins, Postman, Swagger, VS Code, Linux

Experience

Eimple Labs <i>React Developer Intern</i>	Remote <i>Jun 2025 – 2026</i>
○ Built responsive, production-ready web UIs in ReactJS and Material UI (MUI), translating design specs into reusable components. ○ Implemented global state management with Redux, reducing prop-drilling and simplifying data flow across nested components. ○ Handled form validation and secure client-side data flows to ensure reliable API integration with the backend. ○ Refactored and optimized existing components to improve rendering performance and maintainability.	
Eimple Labs <i>Node.js Developer Intern</i>	Remote <i>Jun 2024 – 2025</i>
○ Designed and built RESTful APIs with Node.js and Express.js, documented with Swagger/Postman for frontend consumption. ○ Implemented JWT-based authentication and role-based authorization to secure protected endpoints. ○ Designed and optimized MySQL schemas and queries to support efficient data handling at scale. ○ Collaborated with the frontend team to integrate backend services, closing the loop on end-to-end features.	

Projects

Jankoti Platform	Live
○ Built a full-stack job/internship discovery platform with a React.js frontend and a .NET backend. ○ Implemented browsing, filtering, and application flows to help users find and apply to relevant listings. ○ Designed the system for scalability, separating concerns between the API layer and the client UI.	
Personal Portfolio Website	Live
○ Designed and built a personal portfolio with React and Vite for fast builds and near-instant page loads. ○ Presented projects, skills, and experience through a clean, responsive, mobile-first UI. ○ Deployed on Vercel with a CI-friendly workflow for quick iteration.	

ERP-Based School Management System

- Built an ERP system to manage student records, attendance, and academics for school administration.
- Designed a relational database schema to efficiently store and query institutional data.
- Built role-based interfaces tailored to administrators, teachers, and students.

Research on Foundations of Common Sense Knowledge

- Studied common-sense reasoning principles and knowledge representation techniques in AI.
- Analyzed inference mechanisms aimed at improving machine decision-making and explainability.

Leadership & Extra-Curricular Activities

- **Co-Head, IDEA-THON 2026** – Co-organizing a university-wide ideathon (Dept. of Advanced Computing × YBN Tech Club) on next-generation OS design . ideathon26.vercel.app
- Maintain 19+ public repositories on GitHub spanning full-stack, backend, and portfolio projects .
- Active member of the Coding Club at YBN University, Ranchi.
- Organizing member of Design Hackathon 2024 at YBN University, Ranchi.
- Participated in a hackathon organized by Arka Jain University.
